Dr. Rand remarked relative to the specimen of Cyanide and Nitride of Titanium, presented this evening, that it was obtained from the Salamander of a blast furnace at Spring Mill, from a mass estimated to weigh over a ton.

Mr. Isaac Lea read an extract from a newspaper, relative to the supposed human foot-prints in the New Red Sandstone of Middletown, Conn. The article was written by Prof. B. Silliman, Jr., who believes the impressions to be due to curvature of the strata at the time of formation, and not to be tracks. Prof. Johnston believes them to be tracks, but they are certainly not human.
